A) Assigning every dollar of income to specific expenses, savings, or debt repayment so that total income minus expenses equals zero.

- B) Budgeting only fixed expenses and saving the remaining income.
- C) Saving 50% of income and spending the rest freely.

This method promotes intentional spending and savings. Options B, C, and D describe other strategies but do not accurately define zero-based budgeting.

Answer: A

Explanation: The calculation is $(\text{Expenses} / \text{Income}) \times 100 = (\$3,200 / \$4,000) \times 100 = 80\%$. This indicates that 80% of income is spent, leaving 20% for savings or other financial goals.
